Code the patient's usual performance at evaluation for each activity using the 6-point scale. If activity was not attempted at evaluation, code the reason. Code the patient's discharge goal(s) using the 6-point scale. Use of codes 07, 09, 10 or 88 is permissible to code discharge goal(s).

Safety and Quality of Performance – If helper assistance is required because patient's performance is unsafe or of poor quality, score according to amount of assistance provided.
Activities may be completed with or without assistive devices.
06.**Independent** – Patient completes the activity by him/herself with no assistance from a helper
05.**Set-up or clean-up assistance** – helper sets up or cleans up; patient completes activity. Helper assists only prior to or following the activity.
04.**Supervision or touching assistance** – Helper provides verbal cues and/or touching/steadying and/or contact guard assistance as patient completes activity. Assistance may be provided throughout the activity or intermittently.
03.**Partial/moderate assistance** – Helper does LESS THAN HALF the effort. Helper lifts, holds or supports trunk or limbs and provides, but provides less than half the effort.
02.**Substantial/maximal assistance** – Helper does MORE THAN HALF the effort. Helper lifts or holds trunk or limbs and provides more than half the effort.
01.**Dependent** – Helper does ALL of the effort. Patient does none of the effort to complete the activity. Or, the assistance of 2or more helpers is required for the patient to complete the activity.
If activity was not attempted, code reason
07.**Patient Refused**
09.**Not applicable** – not attempted and the patient did not perform this activity prior to the current illness, exacerbation or injury.
10.**Not attempted due to environmental limitations** (e.g., lack of equipment,
